0 - Battery Recycling Market : A Breakdown of the Industry

The global [battery recycling market](#) is expected to reach USD 28.28 Billion by 2030, according to a new report by Emergen Research. The battery recycling market is witnessing rapid growth in demand as raw materials such as lithium, nickel, cobalt, and manganese used in the manufacturing of cathode of batteries are limited. In contrast, these materials are witnessing an escalating demand from the end-user verticals, including automotive & transportation, consumer electronics, and various other industries. Besides, the raw materials deployed in the making of batteries are detrimental to the environment. Recycling and reusing the constituents in used batteries further aids in the preservation of natural resources; therefore, propelling the market growth for recycled battery materials.
