I was bored so I put together this list. It's of Organization's members, their weapons, element-type things, etc, etc. Tell me if I got something wrong.

Once again, tell me if something's wrong. I'm pretty sure there's not, though. And I might disagree. Like in the case of Xemnas' Aerial Blades. I don't like them being called Light Sabers; it sounds so *Star Wars*. I know the 'elements' aren't really elements but I couldn't think of something else to call them DX
