1 - Artificial Saiyan 1

This was a very good first try. But I am Sorry to say that it has tom much of the ape gene.

Unstable in ape form. Very Primitive.

Attack technique- Drunken Stripe

*Note-

The image is kinda blurry. Most images will be until about the 30th Saiyan posted TY I hope you like it*

2 - 2

By Applying more humanoid Gene that is contained within the saiyan Gene it created this Artificial Saiyan. But by have Adding to Much Of the Gene I seem to have given him 4 arms.

Attack technique- Power Walts

#3

Learning from My mistakes; I took away some of the humanoid gene. But by doing so I have Given this Saiyan 2 tails.

Unstable in ape form.

Attack technique- Twisted Comet

4 - 4

#4

When i took away the Gene that created the extra Tail I thought that the problem would be fixed. But this one has no tail. My First Female I have created.

Unstable in ape Form

Attack - Loving Power Pulsation

#5

The Genes were all correct but this spesiman was created without an arm. I attached a robotic one to replace it.

Attack- Moon lit Bullet

#6

I slightly altered the DNA from before and tried again. The specimen came out without its right leg.

Attack technique- Kick Boxing tornado

7 - 7

#7

I fixed the problem with the previous 2 Artificial Saiyans, But with this new formula I have created an even Bigger problem. This Saiyan is Majorly Obese.

Attack Technique- Crushing Power surge

8

I Subtracted the Fat Gene from the DNA Arrangement. But by doing so this Saiyan is all Skin and Bones.

Attack technique- Thin Slice

unstable in ape form

9

This Specimen is too short. His Height is 2'2. My Data suggests that something went wrong when I equalized the Fat gene.

Attack Technique- Trippin' Bite

Unstable in ape form

10 - 10

10

24'2"

I modified the DNA but I Might have put to much in for this Specimen...

Attack technique- Headbut bullet

Unstable in ape Form

Uh Oh... It's Rage Shenron... You better get that dragon ball away from him!

Go research and try to find away to beat him with useing your power WHICH could damage the Dark Star dragon ball!

11

This Specimen some how turned out with 2 heads. I will Have to Check my Data base for more information on how to change this.

Attack Technique- Double Header!

Unstable in ape form

12 - 12

This Saiyan Has Large Ears. Looks like My Database is Corrupt. By Fixing the Previous Problems with the last Experiment It caused More Problems with the Head and Skull area.

Attack Technique- Sensitive Strike

Unstable in ape form

MY Second Female Creation. It is absent of an amune system.

Attack Technique- Decorative Drain

Unstable in ape Form

#14

I tried to fix the internal organs but it came out with an enlarged tung.

Attack Technique- Acid Saliva

Unstable in ape form

15 - 15

#15

Half Way into his development His Neck Began to become longer.

#16

I went back to previous Formula's and Thought Combined with my New Knowledge of the Neck and Tung Problems I could Be finished. But the Saiyan Created Had 6 Arms. Very Unplanned, my data base should be able to complete it.

Attack Technique- Tornado Blits

Unstable in ape form

#17

This Specimen was Created with 4 tails. I'm Feeling Deja Vu...

Attack Technique- entangle

Unstable In Ape Form

#18

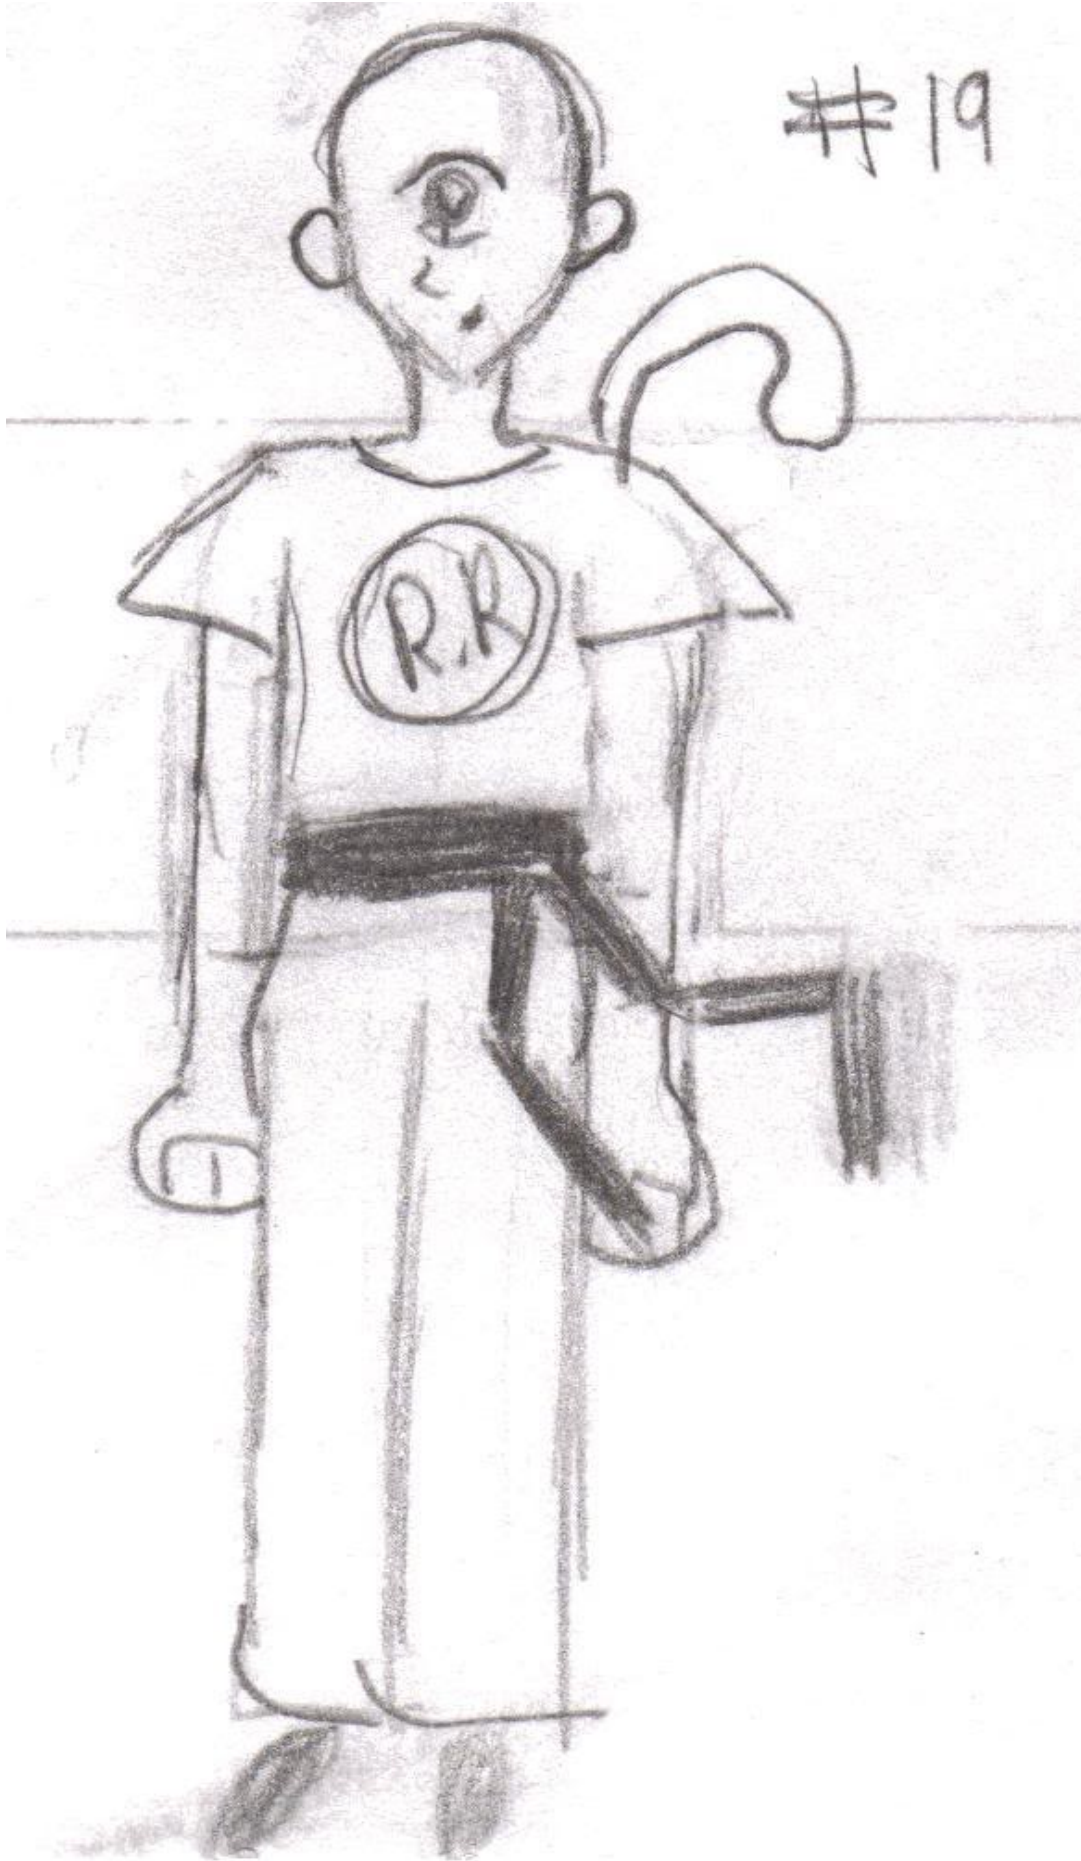

I Fixed what Problems I have currently Had. According to my Data Base this Saiyan shouldn't have any problems. But he has 3 eyes. I will investigate further into this problem.

Attack Technique- Trinhalation

Unstable in ape form

#19

I have fixed the problem of 3 eyes by removing a fourth of the gene. But it seems to have backfired creating a Being with 1 eye.

Attack Technique- Unablom

unstable in ape form

20 - 20

#20

Becuz of the absence in the gene that carry's the eye, I Added 1/3rd more. but By doing so giving the Saiyan eyes all around it's skull.

Attack Technique- Blink Bomb

Unstable in ape form

#21

It's Microscopic. This Came About when I tried to make the Power Lvl of a creation on detectable. But it made Him Undetectable.

Attack Technique- Tic Tac Toe

Unstable in ape form

#22

Still Just as small as before Just heavier in Power and in density.

Attack Technique- Berry Beam

Unstable In ape form

#23

Normal Size. It's still a child, But it is Heavy With Power and density like #22

Attack Technique- CrackCrill

Unstable In Ape form

It's Lims are To Small and it's Body Is round. My Data Base Suggests to remove and add more genes.

Attack technique- rolling Mountain

Unstable In Ape form

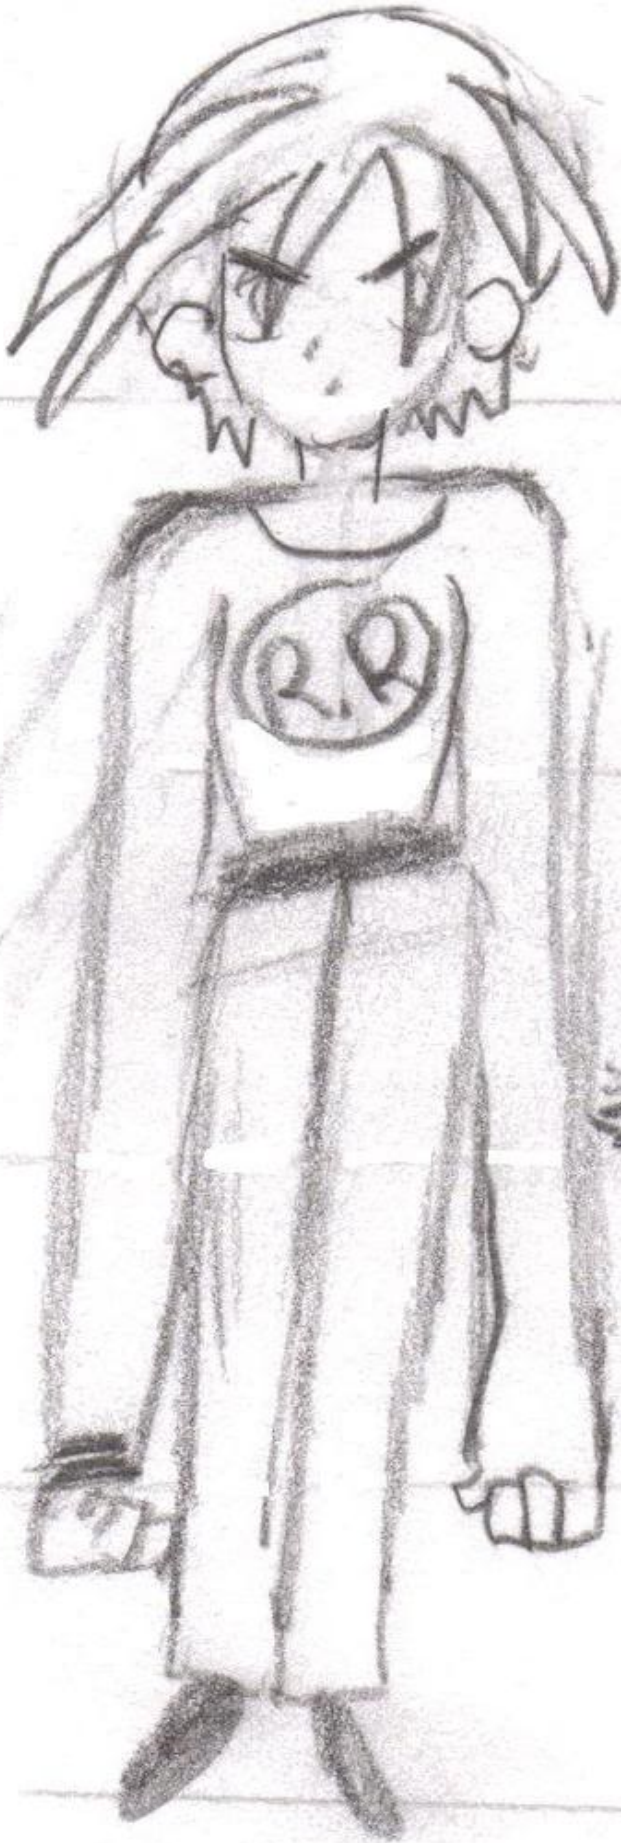

uh Oh It's Oceanous Shenron!

You Better go Research on how to kill it without Hurting the Dragon Ball!

25 - 25

#25

It's Lims Are to big while it's body is to small. Looks like my Data Was Wrong.

Attack technique- Large Loud

Unstable in Ape form

#26

It's Body is Normal Size but it's Arms and Hands are Twice the size of a bulldozer.

Attack Technique- Senile Bulldozer

Unstable in ape form

#27

This Specimen is unable to sleep. I didn't see this in my data.

Attack technique- Rapid Miniature Missile

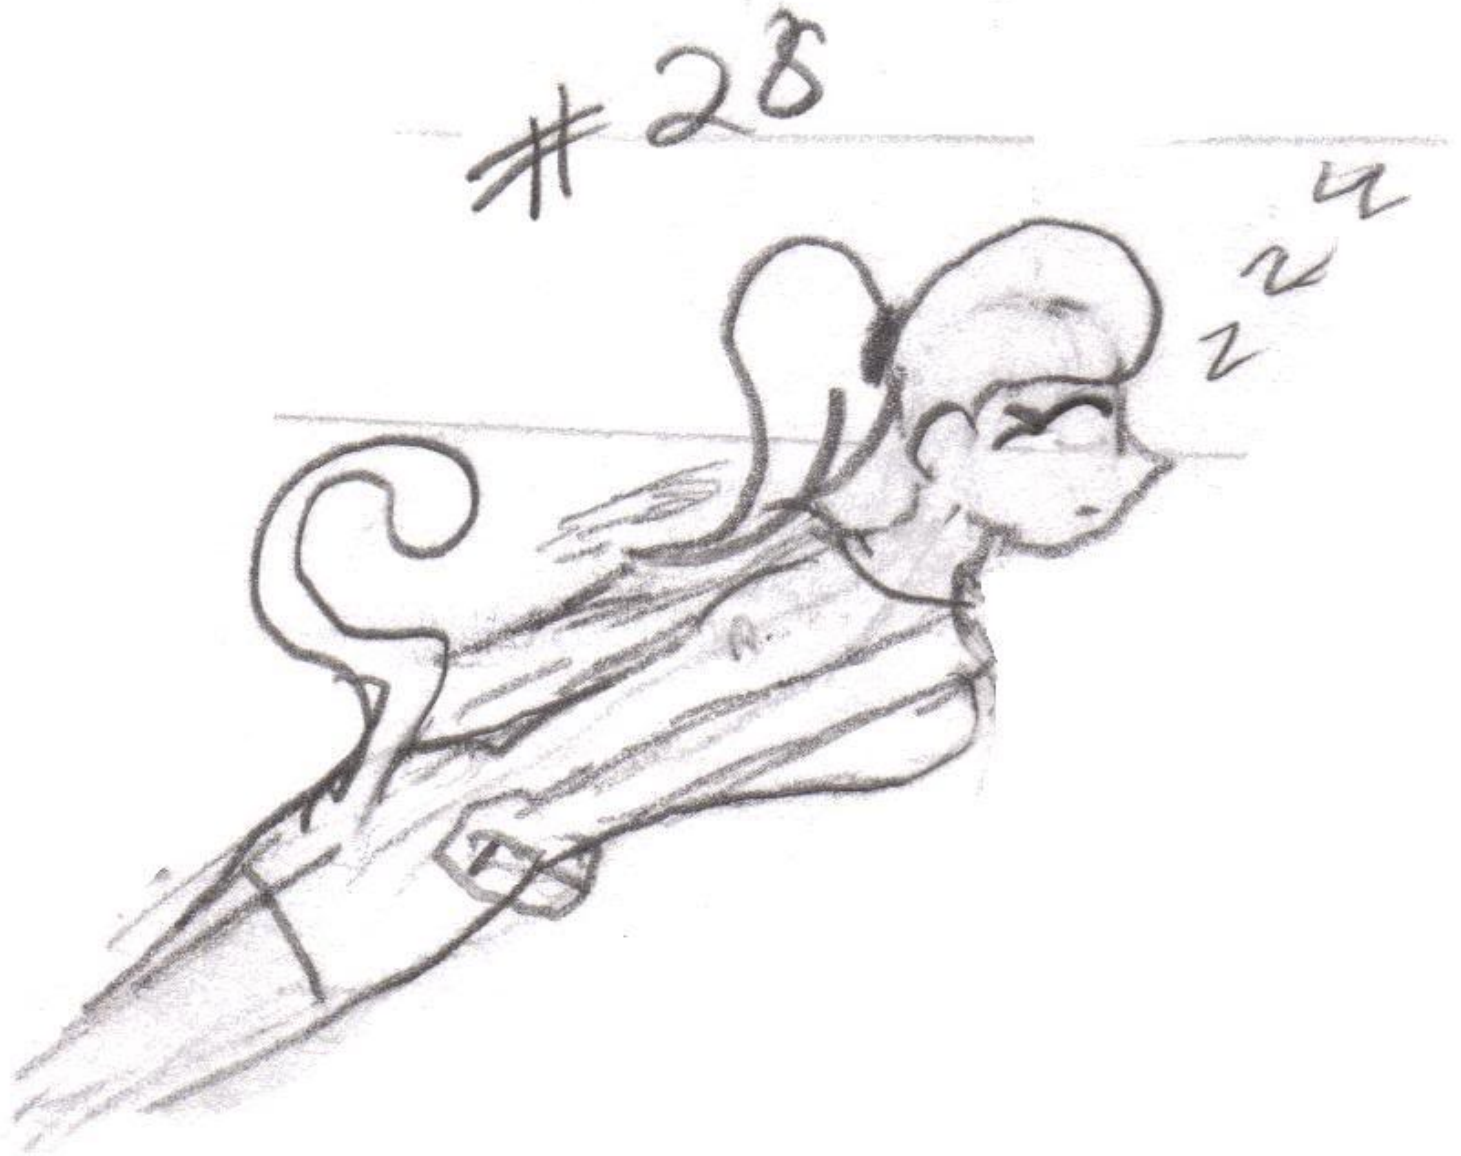

Unstable in Ape Form

Uh Oh... It's Naturon Shenron... You better get that dragon ball away from him!

Go research and try to find away to beat him with useing your power WHICH could damage the Dark Star dragon ball!

28 - 28

By Equalizing the Genes of #27 for this Specimen I created a being that has almost no energy.

Attack technique- Dream Driller

Unstable in ape form

#29

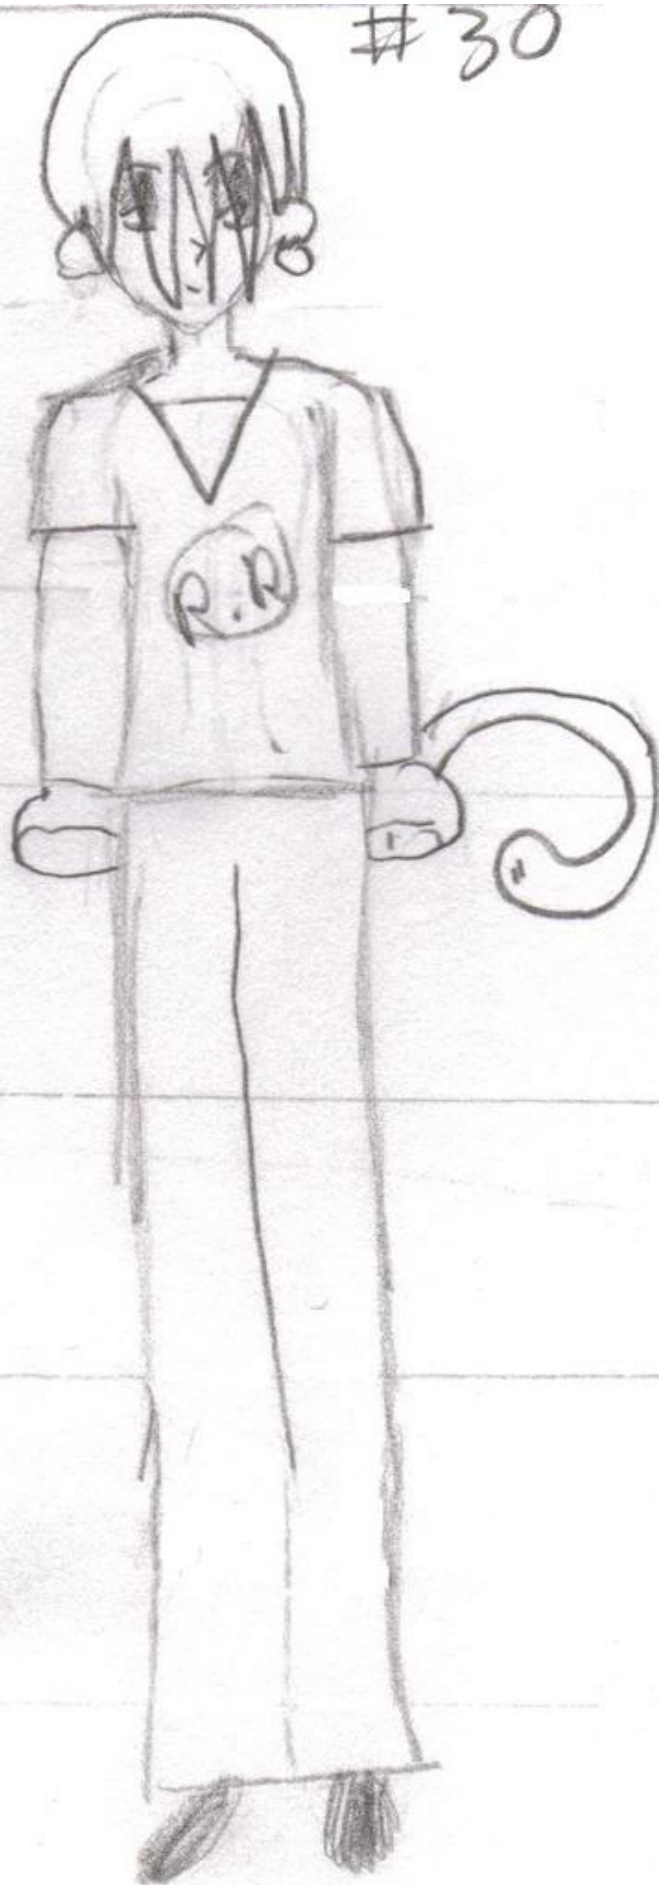

This Specimen has Little legs, giving it the disadvantage of speed and flying imbalances.

attack technique- Spiraling Ape

Unstable in ape form

30 - 30

#30

I added more genes to make the legs longer. But when it was created The Legs turned out to Long. This Specimen has Trouble running.

Attack technique- Splitting Sword

Unstable in ape form

#31

This Saiyan has only 1 Giant Lung. It may Have Troubles with breathing.

Attack technique- Imploding Inhalation

Unstable in ape form

#32

By Adding more genes to this DNA I created a Saiyan Who Breathes Carbon dioxide. If I inhance the Power Levels maybe Problems will stop.

Attack Technique- Green House effect

Unstable in ape form

#33

I have yet to increase the power lvls but when I created this It had no nose.

Attack Technique- Cuddle Crush

Unstable in ape form

#34

I tried to Fix the Problem with #33 but Sadly it came out with 4 nastrals.

Attack Technique- Snot trap

Unstable in ape form

I increased the power. This is Female So Results May Vary On gender... But it Seems It's Skin is green.

Attack Technique- Natures Revenge

unstable in ape form

R
36

It Seems that this Specimen is COMPLETELY unstable! It May be the increase in power...

Attack Technique- Self destruction Disk

unstable in ape form

#32

pp

It has No ears. It's Other senses are sharper than others. I will try to modify the DNA for the next one.

Attack technique- Magnifie Sight

unstable in ape form

38

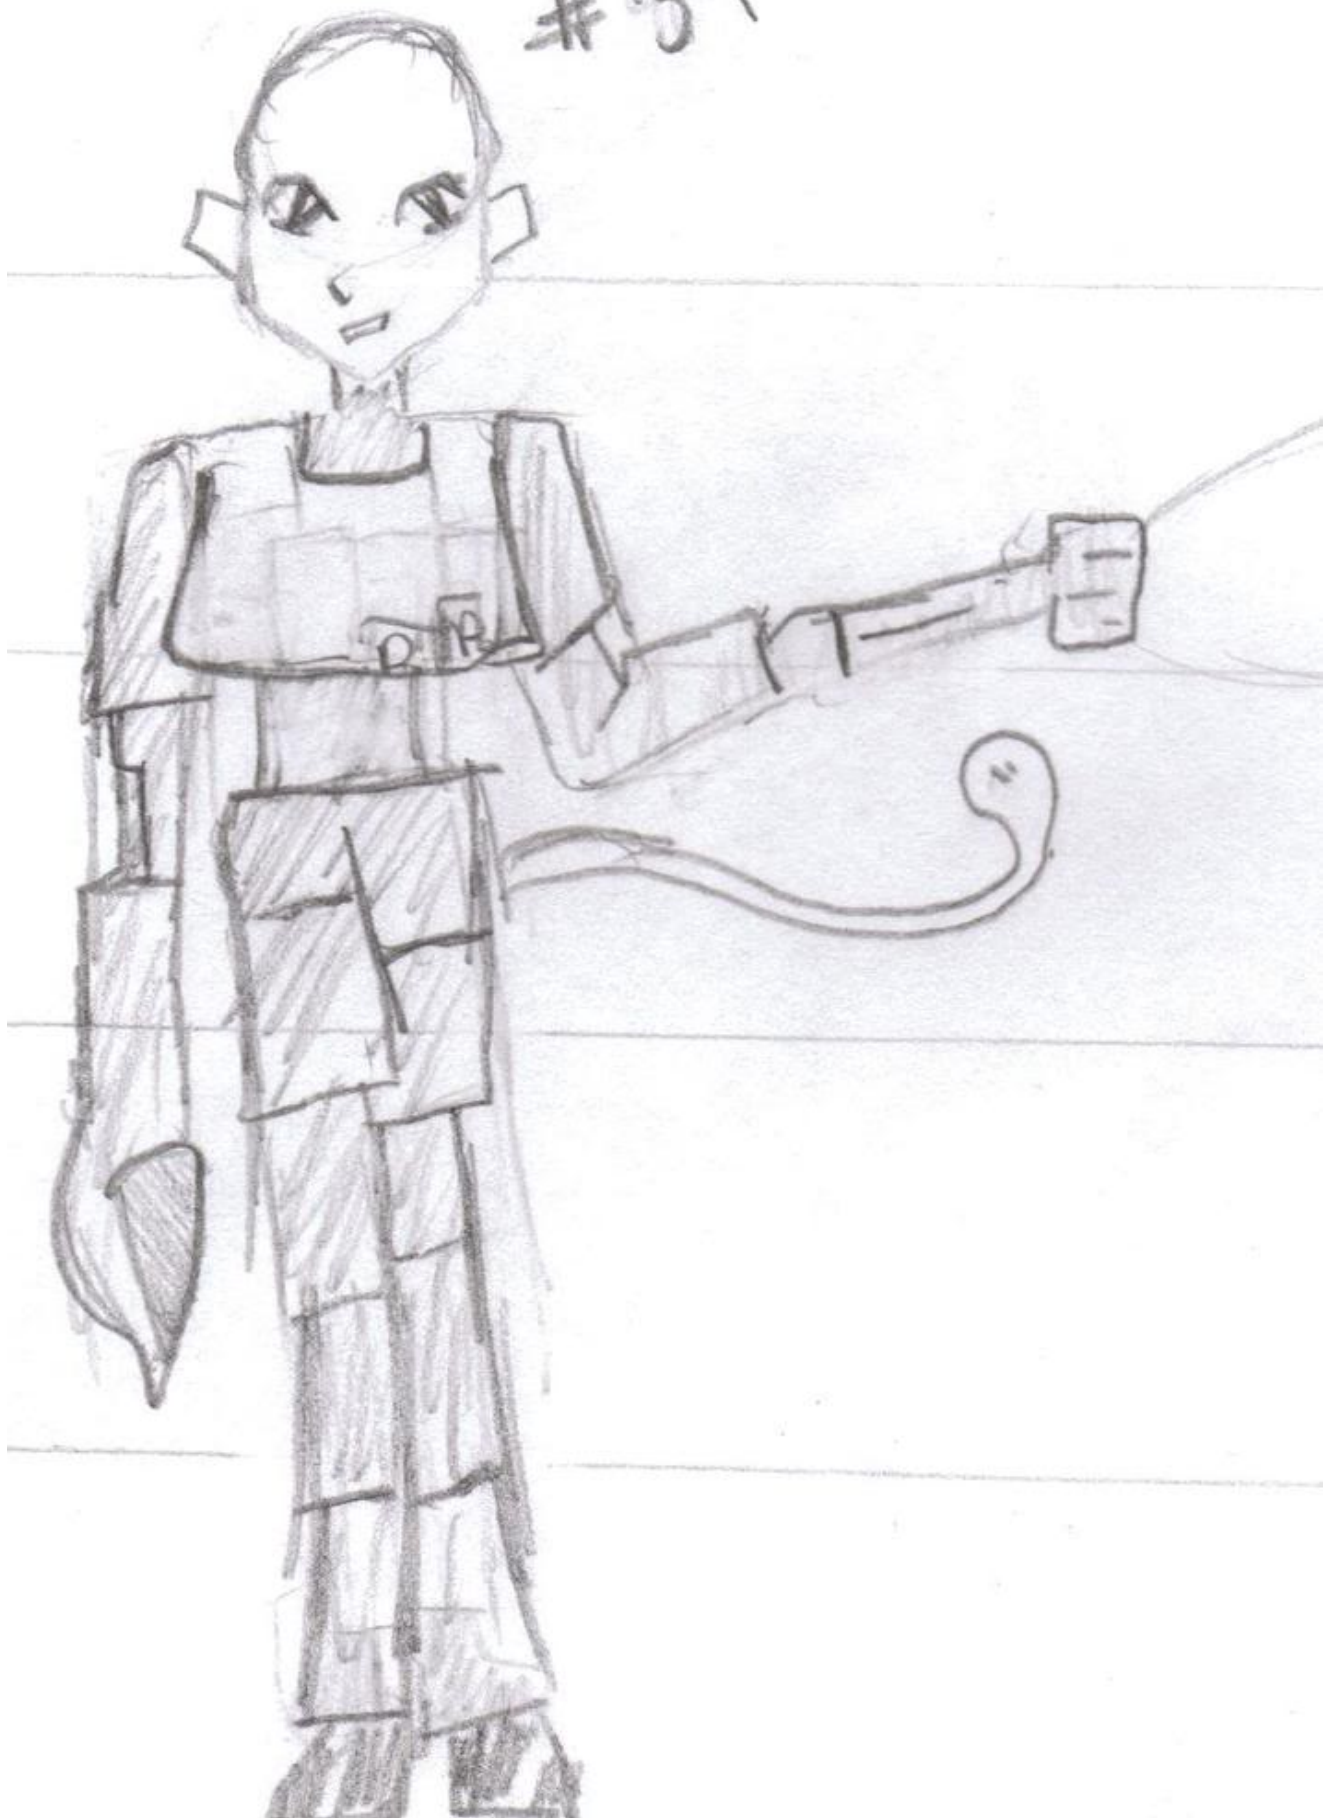

This Specimen's DNA has changed alot from the last one. It has Rock Skin.

Attack Technique- Tecktonic Crush

Unstable in ape form

#39

When It was created it had no skin. So I modifie it so it's outer shell is nothing but steal.

Attack Technique- Hard reg

Unstable in ape form

40 - 40-41

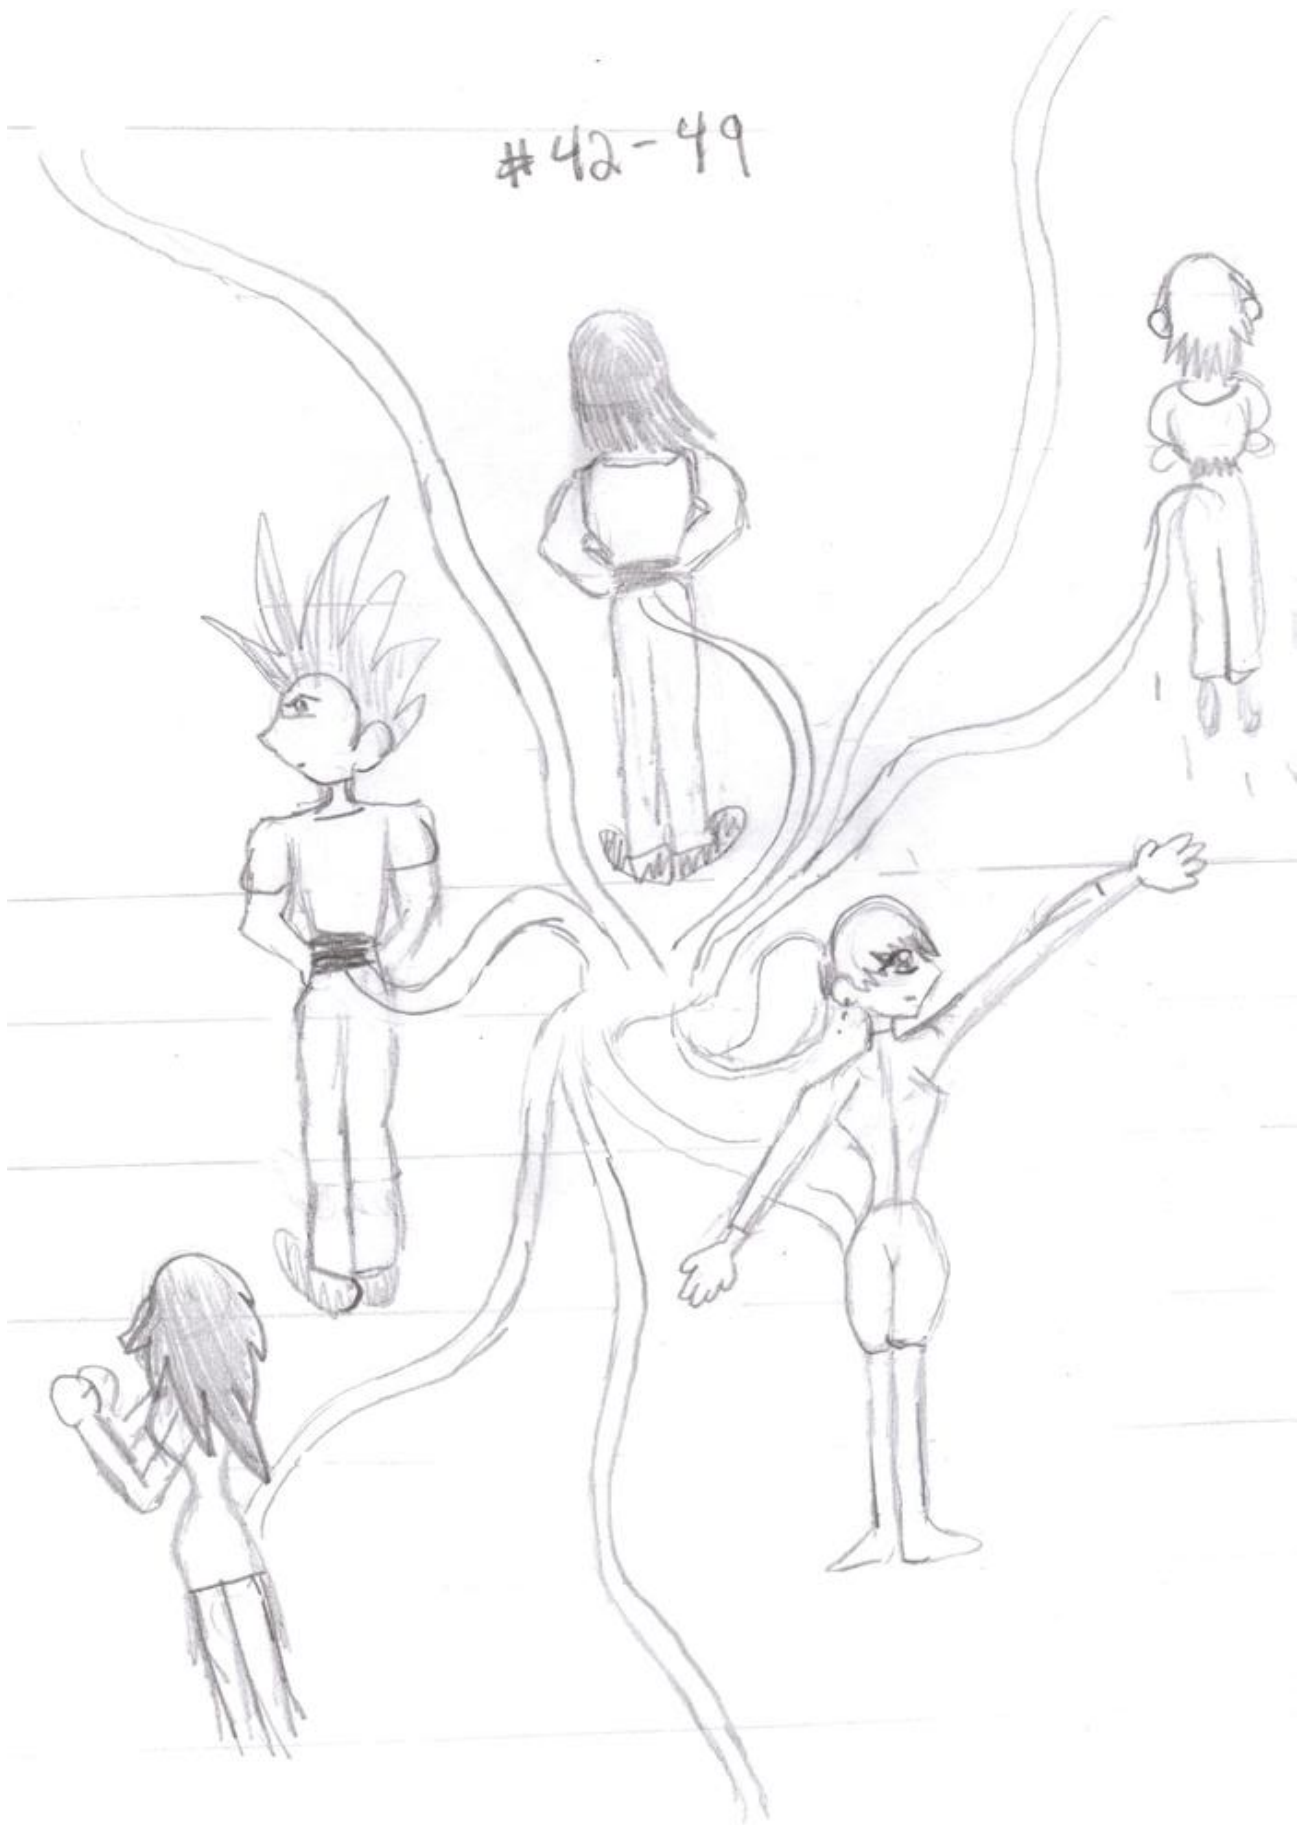

I have made a new break thru. All Saiyans Before Were Unstable in ape form, But I had Planted a small gene in their DNA So they will be able to fuse with each other. But they were unable to defuse. Now I am Trying to Perfect that Gene So that future Generations will be able to become more powerful...

Attack Technique- I've got your Back

Unstable in ape form

41 - 42-49

#42-49

When Created, each of these had a gene that Attracted them to each other. But By Doing so Only attached them by the tail, Making them forever unable to fuse or Detach.

Attack Technique- Power Addiction Blits

unstable in ape form

42 - 50-52

#51
* 50
#50

When I Fused this Saiyan Together The surrounding DNA was combined and Doubled the Ape Gene Making it to Hairy.

Attack Technique- Bloody Blade

Unstable in ape form

43 - 53-54

#53 #54

When Combining to make this Saiyan, the gene's and molecular structure that creates the Arms was double creating this...

Attack Technique- Bones to Dust

Unstable in ape form

44 - 57-58

When Combining their Cellular Structor their Heads stayed in tacted... My Data Base Suggests Data That may fix the problem...

Attack Technique- Head Bomb

Unstable in ape Form

777 - Your wish is at my Command

Hey, Just an announcement... A little contest is going on SPECIALLY for this story! And All you've got to do... IS FIND THAT DRAGON BALL! The Dragon Balls will be spread out on this story. And If you find them all You Get A Prize. But it Won't Be that easy... Every time You Find a Dragon Ball I will Move the Dragon Ball then to this Page Or Scatter them all out again so It's harder to find them.

Just remember to Post the Links to the chapters on this Page ^^ or just the chapter #.

Also Remember there are about 3 sets Of Dragon Balls, And if you find 1, it might not match the rest. And Sometimes I Will Make the Dragon Balls Corrupt Like in Dragon Ball GT and you will have challenges to face to get the dragon balls back to normal.
