# 1 - summary of Glutanio

## Summary of Glutanio

Glutanio is another world very much like our own, yet how our world is split up into different continents Glutanio isn't just one large plain of land, and it isn't spherical!. Its completely flat kind of hexagon shaped and the main area the royal city is called Spikerton.

The people of Glutanio talk a COMPLETELY different language to us but this book has been translated so that people of earth can enjoy it!, the main currency of glutanio is Zark, one Zark is about the same as £50. How we have pounds (£) and Dollars (\$) and Euros (but dont have that key on my keyboard to tuff) they have Zark and the symbol for Zark is a capital Z thats fat at the top and thin at the bottom with a line through it that has a dot on top of it.

Anyhow in Glutanio witchcraft is very common, ogres have been wiped out along with most other mystical creatures thanks to king Mioel, there are a few elves left but mostly halflings king Mioel has wiped out practically everything else, all that is left is the Grark beings (which mean the of old beings) basically the kinds that every kid finds in a story book. a few dwarfs and elves, mermaids and water nymphs its really quite sad!. Our main character is Aria a young girl who unbeknown to her is a halfling but not just any halfling!...
